Dedicated and analytical Computer Science student at GU Tech with a strong background in C programming, Python logic development, and Graphic Design. Combines technical capability with over 4 years of proven tutoring experience in Mathematics and Physics for secondary students. Recognized as a fast adapter capable of mastering complex technical concepts and communicating them effectively.

4+ Years	BSCS	C / Python
Tutoring Experience	GU Tech Scholar	Core Tech Stack

EDUCATION

Bachelor of Science in Computer Science (BSCS)
Sep 2026 – Present

GU Tech, Karachi

- Currently pursuing 1st-year degree focusing on core computing fundamentals, algorithms, and software engineering principles.

Higher Secondary Certificate (HSC) - Computer Science
Aug 2024 – Jun 2026

Iqra Huffaz Boys College, Karachi

- Completed Intermediate education specializing in Computer Science, Mathematics, and Physics coursework.

Secondary School Certificate (SSC) - Computer Science
Apr 2022 – May 2024

Iqra Huffaz Boys School, Karachi

- Graduated with academic distinction, building foundational computer science and analytical skills.

SKILLS & COMPETENCIES

Programming & Tools

C Language · Python · Data Structures · Git & GitHub · VS Code

Design & Communication

Graphic Design · Poster Layouts · Public Speaking · Student Mentorship

TEACHING & TUTORING EXPERIENCE

Academic Tutor (Mathematics & Physics) **2022 – Present (4+ Years)**
Private Academic Mentorship — Karachi, Pakistan

- Delivered customized one-on-one and group lectures in Mathematics and Physics for Matriculation and O-Level students.
- Simplified complex mathematical models, algebraic principles, and physics equations to improve student comprehension and exam scores.
- Assisted students in develop analytical thinking, exam strategy, and logical problem-solving frameworks.
- Extended teaching support to secondary computer science and general science curriculum modules.

TECHNICAL PROJECTS

Student Record Management System **C Language Project**
Console-based CLI Application

- Engineered a command-line utility in C using structures and File I/O for persistent student data management.
- Implemented features for adding, updating, searching, and calculating student grade averages.

Python Automation & Logic Scripts **Python Project**
Algorithm Development

- Developed python utility scripts for automated mathematical calculations and list processing tasks.
- Utilized clean coding standards and algorithmic problem solving.

Branding & Educational Graphic Design **Design Portfolio**
Visual Design & Layouts

- Designed promotional banners, educational infographics, and digital graphics for academic events.

CERTIFICATIONS & TRAINING

Python Programming Certification **Short Course**
Certified in Python syntax, functions, and logic development.

Graphic Designing Course **GU-TECH**
Certified in visual layout, color theory, and digital graphics creation.
